PROFILE

Proactive professional with extensive experience in collaborative team environments and a proven track record of managing significant challenges since 2013. Versatile across a wide range of technologies, I have successfully managed projects in Portugal, Brazil, France, and Switzerland, consistently delivering innovative solutions and demonstrating an ability to tackle complex issues.

PROFESSIONAL EXPERIENCE

Full-stack Developer

Versant Web Mar. 2024 - Present
In charge of the full development of REST APIs with Laravel and interactive CRM applications in React, covering all stages of the process, from database design to the user interface. I also provide support and maintenance for existing projects, ensuring their continuous optimization.

Full-stack Developer

Start.Physio Feb. 2024 - Present
Responsible for the development and structuring of an internal CRM platform, using Laravel and React. I manage the entire process, from architectural design to final features, to deliver a custom solution that meets the company's needs.

Full-stack Developer

Freelancer Aug. 2013 - Feb. 2024
As a freelance developer, I have carried out a variety of projects in web development, mobile applications, virtual reality games, and home automation systems. Using technologies such as Flutter, React Native, Unreal Engine, Laravel, Java, and Kotlin, I have been able to deliver custom solutions. My experience has allowed me to collaborate internationally, with successful project deliveries in Portugal, France, and Brazil.

Projets Freelance Sélectionnés

Webtales

I participated in the development of the UCPA.com platform, integrating advanced technologies such as VueJS, AMP, NodeJS, and GraphQL. I played an essential role in initiating the project, establishing the technical and strategic foundations, and ensured a smooth transition by providing clear guidance to the succeeding team to maintain seamless continuity and efficiency.

AvilConnect

Responsible for project management and development of a Java application with RestAPI, as well as a website using Laravel and React.js. I oversaw all stages, from planning and resource coordination to technical implementation, ensuring smooth integration between the Java backend and web technologies.

PROFESSIONAL EXPERIENCE

Co-founder - VR Developer

Health Care Startup

Aug. 2021 - Mar. 2022

As a Full-Stack Developer, I led the development of a virtual reality game using Unreal Engine 4, specifically designed for rehabilitation clinics. This game aims to support memory disorder treatment through interactive and immersive exercises. I managed the entire process, from planning and visual design to logical implementation, ensuring an optimized user experience tailored to therapeutic needs.

Internship – React Native Mobile Developer

Lusiaves

Jun. 2019 - Sept. 2019

As a team leader, I participated in the development of a React Native application intended for integration into the company's core production line. I collaborated with the team to ensure code quality and alignment of the application with production requirements, thereby contributing to the optimization of efficiency and accuracy in essential processes.

Internship – Full-stack Developer

The SilverFactory

Mar. 2015 - Jun. 2015

As a Full-Stack Developer, I designed and developed websites using a range of technologies, including HTML, CSS, JavaScript, and Laravel. My expertise allowed me to create dynamic and intuitive solutions, combining aesthetics and functionality to meet end-user needs. I also optimized site performance and ensured compatibility across various browsers and devices.
